

AIRCRAFT ACQUISITION SERVICES

JETCO Acquisition Services:

Our boutique style firm has an unmatched reputation for adhering to strong business ethical standards, we always strive for client satisfaction. Client satisfaction is provided through simple diligence, extensive knowledge and good, solid practices. We measure our rewards not only through the compensation we receive, but by the satisfaction we get by truly bringing value to the client.

Our complimentary Multihull Consultation is structured to provide a glimpse into how our expert team can help you to obtain clarity regarding your decision to purchase a private jet. Your choice may range from a new build production jet that is available immediately to a customized project that requires interior outfitting, legal contracts and more. We are here to assist you in choosing everything from the ultimate flight planning to components such as layouts, models, choice of equipment in addition to charter advice.

Some of the areas where our experts will offer you guidance include:

The right choice:

Will your choice of jet allow you to maintain your current lifestyle during your flying endeavours? Is your private jet optimally designed and expertly managed to ensure that in the long term the costs can be kept down and enable you to enjoy your private jet experience?

Our team will share their experience on 'worry-free' programs allowing you to maximize your investment over the long term.

Expert advice in private jet performance:

No two private jets are the same. Every jet currently on the market will offer a different performance, speed, range and comfort. Our team will share our first hand knowledge and experience on flying performance between each model to ensure that you are satisfied when determining the model of your choice. We understand that the purchase of a multi-million \$ private jet is not an everyday decision so you deserve to try and test fly the closest jet where available.

Our team will advise of locations of models available to inspect prior to your purchase and ensure the product you are purchasing is the right one!

Assistance in choosing personalised layouts:

The choice is yours but it is an important one! Our team will analyze with you each type of layout from a strict owner's layout to the numerous different charter versions and everything falling in between. Your long term goals and needs should dictate your choice of layout so let us consult with you to identify the layout that best suits you.

Launching, Delivery & Quality Control:

We will be on hand to supervise the entire purchasing process from start to finish. Superior quality control is necessary to ensure that the jet being purchased meets your expectations but the real key is upon the delivery of the private jet. Upon a delivery of a private jet, common issues will always occur. Under our Delivery Preparation Plan we send our team of consultants to your private jet during the delivery process to ensure these common issues do not occur to avoid out of pocket expenses to the owner.

Expert Charter advise:

Financial charter projections can be provided in the consultation process to highlight the potential revenue your private jet could earn from charter sales.

If you do decide to go down the charter route, then management agreements will be explained in detail and provided during the consultation process.

What to expect?

Your complimentary consultation will be conducted over the course of several meetings with an Air Brand consultant specializing in private jet acquisitions.

Step 1 - Discovery Consultation:

During the first meeting, you and your dedicated private jet specialist will discuss a range of topics designed to explore and establish a framework regarding your current flying plans, your future goals and your vision.

Step 2 - Private Jet Analysis Review:

Your consultant will conduct a comprehensive analysis based upon information gathered during the discovery consultation meetings, in order to determine the best private jet and flying plan strategy for your unique goals and needs.

Step 3 - Private Jet Choice Consultation:

Your consultant will present a strategy based upon a quantitative analysis designed to support your complete flying plans. Together, you will review in greater detail some of the private jet concepts which will help you identify the right aircraft type for your requirements.
